

Are you defending the right data? Cybersecurity assessments, forensics, and secure websites, apps and AI from a national-security practitioner.

COMPANY OVERVIEW

Cain & Associates LLC is an SBA-certified service-disabled veteran-owned small business in Hedgesville, West Virginia. We deliver fixed-scope cybersecurity assessments, forensic examinations, and secure websites, custom apps and AI agents to state and local governments, law enforcement, small businesses and high-profile individuals. Our software side, MCPOTA, builds privacy and anti-spyware tools for Android, iPhone and desktop.

CORE COMPETENCIES

- **Forensic device reviews:** iPhone, Android and computer examinations for spyware, stalkerware and compromise, with SHA-256 fingerprinting and chain-of-custody records
- **Law enforcement forensic capture support** under the agency's legal authority
- **Custom software and AI:** Android, iPhone, desktop and web apps; AI agents and integration with existing tools; remote delivery
- **Websites:** secure redesigns, search engine optimization, accessibility, website and email security (SPF, DKIM, DMARC)
- **Risk and vulnerability assessments and architecture reviews:** network mapping, vulnerability scanning, phishing, wireless, web application, operating system and database assessments
- **Penetration testing** and **cyber hunts**
- **Compliance auditing** and **secure AI adoption reviews**

DIFFERENTIATORS

- **Practitioner-led:** the owner, in cyber defense since 1997, performs the work
- **National-security background:** U.S. Army secure communications; Marine Corps Cyberspace Command cyber protection team; lead security architect for FBI, VA, DEA and NAVSEA vulnerability-management programs; National Cryptologic School
- **Evidence-first:** every collected file hashed and logged; findings report what was observed
- **Plain-language reporting** with findings ranked by risk, so leaders know what to fix first
- **Ships its own software:** MCPOTA's Spygone (spyware detection) and Startsy apps for Android, iPhone, Windows and Mac
